(54) MUSIC DATA REPRODUCTION SYSTEM BY DOWNLOADED PROGRAM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a music data reproduction system by a downloaded program where a server can download an application software program related to the music data to a mobile phone.

SOLUTION: A mobile phone 110 captures music data stored in a data card 101 by inserting the data card 101 to the mobile phone 110 and a user selects an application software program suitable for the music data form which is specified according to the music data, among a plurality of application software programs (131, 133) and allows a remote server 130 to download the program to the mobile phone. Through the configuration above, the user can select the application software program related to the music data and download the selected software program to the mobile phone from the server.
